OCCUPATIONAL SKILLS PROGRAMME

Domestic Water and Drainage Pipe Repairer

Occupational Skills Programme: Domestic Water and Drainage Pipe Repairer

Programme / Qualification ID	NQF Level	Credits	Programme Type
SP-191201	2	49	Occupational Skills Programme

01 Programme Overview

Domestic Water and Drainage Pipe Repairer covers the installation, repair, maintenance and testing of domestic water supply and drainage systems. The programme content includes repairing leaking pipes and blocked drainage systems, interpreting plumbing drawings and conducting pressure tests. It also addresses plumbing safety procedures and applicable standards. These topics bring together the water supply and drainage activities described in the programme, with safe working practices forming part of the learning content.

02 Key Learning Outcomes

- Repair leaking water pipes.
- Repair blocked drainage systems.
- Interpret plumbing drawings.
- Conduct pressure testing.
- Apply plumbing safety procedures.
- Comply with SANS standards.

03 Programme Information
